

SHUTTERING OIL

It is a concentrated emulsified chemical mould release oily liquid. It is a carefully blended combination of refined emulsified mineral oil and chemical release agent. Available in water emulsifiable form also. 1 Ltr. oil cube mixed with 3-4 ltr. water. It gives coverage of 8 to 10 m² per liter depending on the surface texture & porosity of the formwork.

SPECIFICATIONS

PROPERTIES	SHUTTERING OIL
Form	Liquid
Color	Brown Color
Sp. Gravity	0.85 Kg / Ltr
Emulsion Stability	Pass
Packing	200 Ltrs. / 50 Ltrs.

ADVANTAGES

- Suitable for all types of framework / moulds.
- Reduces concrete contamination.
- Gives fair faced concrete finish.
- Economical & easy to use.
- Cost effective for storage & transportation.

USE: It is used for easy and strain free release of concrete moulds and all type of framework.
