

SUNMOL-SNF 2607 LIQUID

Sunmol-SNF 2607 Liquid is a Dispersing Agent. It is sodium salt of sulphonated naphthalene formaldehyde condensate. It is an excellent dispersing agent, which is largely used by disperse dyes manufactures; cement industries and construction industries. Also used by textiles, pesticides, paints and leather industries.

SPECIFICATIONS

PROPERTIES	Sunmol-SNF 2607 Liquid
Chemical Nature	Salt of Naphthalene Sulphonic Acid condensation product.
Appearance	Dark Brown color liquid.
Solubility (10% solution in water).	Should be Clear.
Solubility to 5% NaOH	Good. No precipitate.
pH (10% solution in water)	7.00 to 8.50
Sp. Gravity	1.2 Min. (GM/ML)
Nature of Ash	Chlorine - Absent, Sulphate - Positive, Lead - Nil.
Solid Content	43.0 Min. (w/w %)
Sulfate Content	6.0 to 8.0 Max. (w/w %)
Ash Content	30.0 to 32.0 (w/w %)
Dispersion Test	Should pass.
Flammability	Non-flammable
Packing	As per party's order (Drum pack or Tanker load).

USE: It is an excellent dispersing agent, which is largely used by disperse dyes manufactures; cement industries and construction industries. Also used by textiles, pesticides, paints and leather industries.
